

p.54-55 Vertex form of Quadratic Functions

p.54

Warm-up

What kind of graph is this?

linear

y-intercept: (0, -5)

x-intercept: (-2, 0)

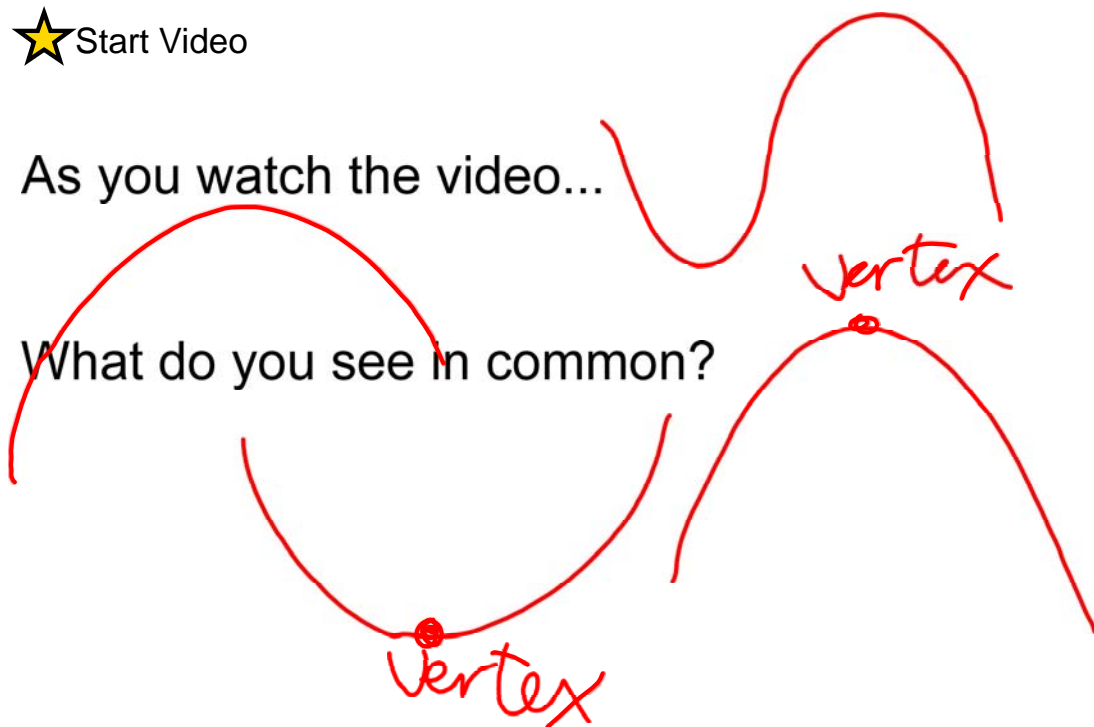

Domain: $(-\infty, +\infty)$

Range: $(-\infty, +\infty)$

★ Start Video

As you watch the video...

What do you see in common?

Parent Quadratic Function

The parent quadratic function is $y = x^2$.
 Substitute 0 for x in the function to get $y = 0$. The vertex of the parent quadratic function is $(0, 0)$.
 A few points near the vertex are:

x	-3	-2	-1	1	2	3
y	9	4	1	1	4	9

The graph is symmetrical about the line $x = 0$. This line is the axis of symmetry.

Vertex Form of a Quadratic Function

The vertex form of a quadratic function is $y = a(x - h)^2 + k$.
 The graph of this function is a transformation of the graph of the parent quadratic function $y = x^2$. The vertex of the graph is (h, k) . If $a = 1$, you can graph the function by sliding the graph of the parent function h units along the x -axis and k units along the y -axis.

If $a \neq 1$, the graph is a stretch or compression of the parent function by a factor of $|a|$.

★ $0 < |a| < 1$

The graph is a vertical compression of the parent function.

★ $|a| > 1$

The graph is a vertical stretch of the parent function.

$$f(x) = a(x - h)^2 + k$$

Vertex Form

$$y = a(x - h)^2 + k$$

This makes it easy to find the vertex and the axis of symmetry

Line of symmetry

$$x = h$$

Vertex

(h, k)

Given the graph of a quadratic, state all the important information.

1.) Opens: down Max/Min: max
 Axis of Symmetry: $x=7$ vertex: $(7, 1)$
 Domain: $(-\infty, +\infty)$
 Range: $(-\infty, 1]$

2.) Opens: UP Max/Min: min.
 Axis of Symmetry: $x=2$ vertex: $(2, -4)$
 Domain: $(-\infty, +\infty)$
 Range: $[-4, +\infty)$

3.) Jennifer hit a golf ball from the ground which could be represented by the function $h(x) = -10x^2 + 100x$, where x is the time in seconds, and h is the height of the ball in yards. At what time did her golf ball reach its highest point? What was the height at this time?
 $-10x(x-10)$ 5s $x-10=0$ $h=250$
 $h = -10(5)^2 + 100(5)$

Graph each quadratic function given its standard form. State all the important information.

4.) $y = (x-1)^2 + 3$
 a+ Opens: UP Max/Min: Max
 Axis of Symmetry: $x=1$
 Vertex: $(1, 3)$
~~Max/Min:~~
 Domain: $(-\infty, +\infty)$
 Range: $[3, +\infty)$

4.) $y = -(x+4)^2 - 2$
 Opens: _____ Max/Min _____
 Axis of Symmetry: _____
 Vertex: _____
 Domain: _____
 Range: _____

5.) $y = (x+2)^2 + 1$
 Opens: _____ Max/Min _____
 Axis of Symmetry: _____
 Vertex: _____
 Domain: _____
 Range: _____

6.) $y = 2(x-1)^2 + 3$
 Opens: _____ Max/Min _____
 Axis of Symmetry: _____
 Vertex: _____
 Domain: _____
 Range: _____
